WHO WE ARE WHAT WE DO

LUMIVEN is a European company specialized in the conception and the manufacture of design luminaires and LED lighting solutions. With an extensive experience and a commitment to innovation, LUMIVEN has become a major player in the world of lighting. We design only with the best components to ensure the highest performance and light quality.

With an extensive experience and a commitment to innovation, LUMIVEN® has become a major player in the world of lighting. We design only with the best components to ensure the highest performance and light quality. We know our products provide long-lasting quality because our clients have been using them successfully for years across hundreds of projects worldwide. We are committed to guaranteeing

you a unique service based on values of trust, responsiveness and efficiency.

Today, the criteria of energy savings, performance, security and visual comfort are in the center of the various market participants' requirements.

All the actors in lighting (contractors, architects, designers, consultants and end users) expect to find solutions adapted to their needs and meeting today's economic, environmental and social stakes.

This is why Lumiven strongly developed its activity by offering:

- LED innovative products into a wide range of solutions
- Competitive price positioning
- Reactivity and flexibility

LINEAR SERIES

The new series are with miniaturised optic, providing high visual comfort, adopting the physical principle of pinpoint lamps, generating CIRCULAR light emission. Compact rectangular designs never fail to impressing professionals, frames made of die-cast aluminum with high heat dissipation ability to ensure the stunning lifespan of LEDs. Multiple sizes, two kinds of installation methods, trimmed and trimless, trimless version allows the lighting blend in perfectly with the surrounding architecture. With the ultra shallow depth of only 60mm, LC is suitable for the most difficult void situations such as air conditioning ducts, sprinkler pipes, beams.

IN-GROUND LUMINAIRES

Our ground and floor-recessed luminaire fittings are designed to create luminous paths or enhance architecture and tree clusters. Exclusive features include miniaturisation, chromatic quality, energy efficiency and superior visual comfort. Optics, reflectors and lenses produce a wide range of distributions and effects that are amplified by numerous accessories. Single and double adjustability are also guaranteed, as well as extreme reliability and a high level of resistance to weather, slipping and vandalism.

OUTDOOR LIGHTING

A wide variety of product categories are included under outdoor lighting, which is used to brighten seating areas, sidewalks, and entrances for both decorative and security reasons. Garden lights, which come in a variety of designs and are excellent for evening entertaining on a patio or deck, can both bring ambiance and the useful element of illumination to an outdoor environment. Outside lights are a wonderful safety measure to increase the security of a property, illuminating dark areas. They come in a variety to suit both household and commercial purposes
